-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Rejections - 35 USC § 112

1. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

2. Claims 16 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

The terms "increased" and "reduced" in claim 16 are relative terms which renders the claim indefinite. Increased or reduced relative to what?

Claim Rejections - 35 USC § 103

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

4. Claims 1-19 are rejected under 35 U.S.C. 103(a) as being unpatentable over EUROPEAN PATENT APPLICATION 1 176 004 (hereinafter EP '004),

in view of ULLMANN'S ENCYCLOPEDIA OF INDUSTRIAL CHEMISTRY (hereafter ULLMANN'S), and

Art Unit: 1773

in view of CULBERTSON ET AL (US 4,571,363) or KELLY ET AL (US 4,098,952).

EP '004 discloses a single-layer or multilayer film having the recited R-value, emax ratio, polyester compositions, symmetrical structures, fillers and/or white pigments, thickness, method of making, and uses of said film. (see entire document, particularly paragraphs 0017-0021, claims) However, the reference does not explicitly disclose acrylic coatings.

ULLMANN'S discloses that it is well known in the art to apply functional coatings such as acrylic coatings to polymeric films in order to improve adhesive properties (section 2.4.2)

CULBERTSON ET AL and KELLY ET AL each disclose that it is well known in the art to apply crosslinkable aqueous acrylic coatings to polyester films in order to promote adhesion to subsequently applied coatings. (CULBERTSON ET AL, line 20-37, col. 2) (KELLY ET AL, lines 49-55, col. 1; lines 44-60, col. 4)

It would have been obvious to a person of ordinary skill in the art at the time the invention was made to apply known functional coatings such as acrylic-based primers to the polyester films of EP '004 in order to improve adhesion. One of ordinary skill in the art would have used conventional protective and/or color-modifying additives to reduce yellowing (claim 14).
